

# UJAH OCHEOLA STEPHEN

Portfolio website: <https://ujah-stephen.vercel.app>

LinkedIn: <https://www.linkedin.com/in/ujah-stephen/>

Email: [stephenujah@yahoo.com](mailto:stephenujah@yahoo.com)

## Profile:

*A detailed oriented and result-driven software developer seeking to work in an environment where I can utilize and enhance my skills to contributing to cutting-edge projects.*

## SKILLS AND EXPERTISE

- ❖ Stacks include: HTML, CSS, JavaScript, TypeScript, Bootstrap, Tailwind, Firebase, React-Redux, Nodejs, Express, MongoDB.
- ❖ Interpersonal skill and handles responsibilities with minimal supervision.
- ❖ Proficient in Debugging and problem-solving.
- ❖ Communication skills and teamwork skills.
- ❖ Experience with various Dev-Tools that optimizes performance.
- ❖ System Configuration and Networking

## WORK EXPERIENCE

- |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |                                                               |

- Troubleshoot and debug issues, providing timely resolutions.
- Ensure the security and integrity of data by implementing appropriate measures.

### **COMPLETED PROJECT**

Successfully completed an EdTech project. The project involved developing a learning management system that provides functionality for managing courses, enrollments, users, assignments, and feedback. The project utilized Node.js, Express.js, and MongoDB for the backend implementation, allowing users to access and interact with the system through well-designed API endpoints.

#### **❖ BJ-BISON VENTURES LTD.**

**2018 – 2020**

**Position: Field Service Engineer (Team Lead)**

##### **Roles and Responsibilities:**

- Performed routine procedures as prescribed for power, transmission and BTS networks
- Responded to emergency faults and ensured all faults are rectified promptly
- Swiftly diagnosed and cleared any faults or alarms assigned by trouble ticket

#### **❖ HUAWEI TECHNOLOGIES Inc.**

**2016 – 2018**

**Position: Network Maintenance Engineer**

##### **Roles and Responsibilities:**

- Conducted on-site maintenance and repairs on BTS equipment, ensuring optimal availability and performance.
- Collaborated with cross-functional teams to identify and resolve technical issues.
- Conducted preventive maintenance procedures to reduce downtime and improve customer satisfaction.

## **ACADEMIC QUALIFICATIONS**

Bachelor of Engineering, Electrical and Electronics Engineering

**Federal University of Agriculture, Makurdi, Benue State.**

**2012**

Senior Secondary School Certificate

**Mivara Secondary School, Lagos State.**

**2005**

## **REFEREES**

**Available on request**
